

# Hot Dip Galvanized Steel Pipe - Data Sheet

Mejor Steel, export sourcing for steel pipe and OCTG | Request a quotation: <https://mejorsteel.com/get-a-quote/>

## Specifications

|                       |                                                    |
|-----------------------|----------------------------------------------------|
| Outer diameter        | 1/2" - 12" (21.3 - 323.9 mm)                       |
| Wall thickness        | 1.5 - 12 mm                                        |
| Schedule              | Light, medium, heavy (BS 1387)                     |
| Length                | 6 m, or custom 5.8 - 12 m                          |
| Ends                  | Plain, threaded and coupled, grooved               |
| Surface treatment     | Hot dip galvanized, pre-galvanized                 |
| Manufacturing process | ERW or seamless base pipe, then hot dip galvanized |
| Pressure rating       | Low to medium pressure                             |

## Grades supplied and minimum properties

| Grade   | Yield strength       | Tensile strength     |
|---------|----------------------|----------------------|
| Grade A | 205 MPa (30,000 psi) | 330 MPa (48,000 psi) |
| Grade B | 240 MPa (35,000 psi) | 415 MPa (60,000 psi) |

- Grade A
- Grade B
- S235JR
- St 37

## Inspection & testing

|           |                                                                                                                                                      |
|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| Packaging | Sea-worthy export packing: bundled by size, plastic caps on both ends, corrosion protection on request, stencilled with size, grade and heat number. |
| MOQ       | One bundle or one truckload; mixed sizes within a bundle accepted.                                                                                   |
| Lead time | Stock sizes: 7-15 days. Mill run / non-stock: 4-6 weeks after order confirmation.                                                                    |

- Zinc coating weight measurement
- Coating thickness measurement
- Uniformity of coating test
- Hydrostatic pressure test
- Visual and dimensional inspection
